Effect plug-ins described in the SDK can be run not only in After Effects, but also in Adobe Premiere Pro Adobe Premiere Elements. AEGP plug-ins can process almost any element of After Effects projects, preferences, internal commands, trigger and call commands. EMP plugins can output video to video hardware. The biggest change that is new is 64-bit support. As a result of the 64-bit port, we had to change the code if you assumed it was a long 32-bit. 32-bit binaries are not supported in CS5. Sample projects can be moved to 64-bit on Windows and Mac OS. New Drawbot packages replace previous drawing methods. For an example of how to use Drawbot, see the ColorGrid sample project. Multi-byte platform paths upgraded to Unicode. This requires changes to the AEGP entry point function, various AEGP packets, AEIO_FunctionBlock in the system.
